Who is your target user? How much experience do they have with technology?			What views do you need to create to meet each feature in your app? How will the user get to each view? Revisit this regularly. Simplify each time. Focus on the user. Make a connection to the controller behind the view.  Draw each view and map out how the user will get to each of them.  Landing page			CONTROLLERS  Create a controller for each wireframe you made. Make a connection to each endpoint it needs to use to get its data.  Auth Controller  - Login  - Logout  - Register  Games controller  - Get all games  - Add new game  - Delete existing game  - Edit existing game  Cart controller  - Add to user's cart (ID on query)  - Delete from user's cart  - Edit user's cart  - Get cart by id			ENDPOINTS  List the url, REST method, and a sample of the data being sent or received for every endpoint you need.  Make a connection to the parts of the schema you need to access from each endpoint to return or save the data needed.  app.post('/auth/login') app.delete('/auth/logout') app.post('/auth/register')  app.post('/api/games') app.delete('/api/games/:id') app.put('/api/games/:id')  app.post('/api/cart') app.post('/api/cart') app.put('/api/cart') app.pet('api/cart') app.pet('api/cart') app.get('api/cart') app.get('api/cart')			SCHEMA Create your schema here including your data types.		
Write use of IE - As a use of Use color to As a use As an a As an a As an a	cases for your app. er I can store a list of my favorite food. o separate features by 'Minimum Viable Proceser I can browse and search available er I can add games to my cart and ser I can delete items from my cart er I can create an account admin I can add to the available gamendmin I can delete available games (admin I can delete available games).	ple games I purchase easily t ames price, name, etc)
